A NEW GENERATION OF

# Bathing experiences

HAS ARRIVED...

MicroDerm™  
THERAPEUTIC BATH

MICRODERM™  
SURROUNDS YOU  
IN MILLIONS OF  
MICROBUBBLES  
*that clean and exfoliate  
the skin, leaving you  
feeling relaxed  
and rejuvenated.*

## The Mansfield® MicroDerm™

**Therapeutic Bath** silently infuses your bathwater with millions of microbubbles that help you relax and feel rejuvenated. The widespread appeal of the effervescent MicroDerm™ Therapeutic Bath comes from both the relaxing warm water experience that helps soften the skin and the resulting clean, exfoliated skin.

What will MicroDerm™ do for you? Millions of oxygen-rich microbubbles swirl around your body helping you rest and unwind. Feel tensions dissolve as millions of tiny bubbles burst to help clean and hydrate your skin while exfoliating its outermost layer. The result? A stimulating bathing experience that makes your skin feel softer, more energized and beautiful.

## Experience the luxury and benefits of microbubble bathing.

1. **Relaxes the bather** – unique luxury bathing experience that quietly fills the bathwater with millions of microbubbles that embrace the bather helping them relax and release muscle tension.
2. **Exfoliates skin** – oxygen-rich microbubbles remove the outermost layer of skin leaving behind beautiful, hydrated skin that feels warm and moisturized.
3. **Cleanses skin** – the magnetic action creates the positive charge in the microbubble and the massaging element of the bubble lifts off the dead skin and dirt from the skin which softens and soothes the skin.
4. **Softens skin** – liquid film technology super-saturates the bath with up to 50% more dissolved oxygen molecules than in regular water to gently stimulate and soften skin.
5. **Moisturizes skin** – 100% of test participants\* demonstrated improved hydration and moisture content in the upper layer of the skin after a ten minute immersion in the microbubble bath.
6. **Heats water** – as microbubbles burst against submerged skin, heat is released to invigorate the skin surface and warms the water, increases the temperature and eliminates the need to add hot water.
7. **Kills bacteria** – kills the bacteria Legionella and Aeruginosa while conditioning the skin.
